

Rabbit quiz

True/False

1. Rabbits like to stand up on their back legs.

Answer: **TRUE** – Rabbits like to stretch up and see what’s going on around them, so their homes should let them stand up without their ears touching the roof.

2. Rabbits like to eat mostly carrots.

Answer: **FALSE** – Rabbits like carrots but should only be given them in very small amounts now and again as a treat as they are high in sugar. They need to eat lots of hay and grass.

3. Rabbits like their owners to spend time with them.

Answer: **TRUE** – Rabbits like their owners to sit quietly with them at ground level and to gently stroke them.

4. Rabbits like to live on their own.

Answer: **FALSE** – Most rabbits get bored and lonely if kept on their own. They normally like to be kept with another friendly (neutered) rabbit. Rabbits and guinea pigs should not be kept together as they have different needs.

5. Rabbits like to keep healthy by riding a bike.

Answer: **FALSE** – Rabbits can’t ride a bike, but they do need to be able to exercise every day to stay fit and healthy. Did you know that rabbits have long, powerful hind legs that allow them to achieve speeds of up to 50 miles per hour for short bursts?

6. When rabbits are ill they should be taken to a vet.

Answer: **TRUE** – Rabbits should be taken to see the vet when they are ill. They also need to see the vet for regular health checks, at least once a year.
